Design Lab

Summary

- Using the same process that we used during the demo, you're going to create at least 2 views for an ecommerce store using Figma. You'll need to create the wireframes and mockups for each view, as well as a style guide for the whole project.

Part 1: Wireframes

Summary

- Create the wireframes for a individual product view and for a cart page

Instructions

- Decide what kind of store you'll be making (Some ideas: clothing, books, food, makeup, sports, camping gear, games, electronics, auto parts)
- Go around to a few shopping sites and see what kind of things are included on their product pages
- Product view requirements

  - *Header*
  - *At least 1 picture of the product*
  - *Product name*
  - *Product price*
  - *Product description*
  - *Buy button*
  - *Anything else you want to include*
- Now go around and look at different cart pages and see what things you might like to put in your design
- Cart view requirements

  - *Pictures of each item*
  - *Names of each item*
  - *Quantity of each item*
  - *Prices of each item*
  - *Total price*
  - *Checkout button*
  - *Anything else you want to include*

Part 2: Style guide

Summary

- Create a style guide guide frame in your Figma workspace. Make note of all the rules you want to define about your styling.

Instructions

- Decide on a color scheme

- Decide on a font or two

- Create layout and spacing rules

- Write icons/illustrations/picture rules

- Plan out any reusable elements (buttons or cards)

- Write other dos and don'ts of your design guide

Part 3: Mockups

Summary

- Now you'll create the high fidelity mockups of your views based on the wireframes and your style guide.

- Create the basic layout

- Add in the text and images

- Tweak the sizes and spacing to match your style guide

More Views

- If you have completed 2 views, add any more you'd like from the following list.

  - *Home Page*

  - *All Products Page*

  - *Pages for different sections of products (Fiction, Nonfiction, Childrens, etc. for a book store)*

  - *Login Page*

  - *Settings Page*
